

DATA ANALYST APPRENTICESHIP

Stop Guessing. Start Knowing

*In today's fast-paced digital landscape, organisations need to build capabilities that combine operational excellence with modern technology. Qualitrain's **AI and Digital Apprenticeships** integrate **Lean and Six Sigma** expertise with hands-on experience from real-world digital improvement projects—equipping teams with the skills to drive efficiency, innovation, and sustainable results while building tomorrow's capability, today.*

What Is a Data Analyst?

A Data Analyst turns complex data into clear, actionable insight that supports better business decisions.

They work with data from across the organisation, analysing trends and patterns and presenting findings through dashboards, reports and analysis that can be understood and used by teams and leaders at all levels. This **Level 4 apprenticeship** develops advanced analytical skills that help organisations move beyond basic reporting and use data strategically.

Who Is This Apprenticeship For?

- Organisations across all sectors where data informs decision making
- Employees already working with data who need to deepen their analytical capability
- Individuals responsible for reporting, analysis or performance insight
- Businesses looking to move from descriptive reporting to predictive insight

Key Skills Developed

- ✓ Gathering and validating complex data from multiple sources
- ✓ Advanced data analysis and statistical techniques
- ✓ Identifying trends, patterns and root causes
- ✓ Creating dashboards, reports and predictive models
- ✓ Communicating insight clearly to technical and non-technical stakeholders

Why Employers Choose This Course

- Transforms raw data into strategic business insight
- Strengthens internal analytical capability at a higher level
- Supports better operational, tactical and strategic decisions
- Applicable across all departments and sectors
- Develops future data leaders and analysts
- Fully funded through the Apprenticeship Levy

Funded Through the Apprenticeship Levy

Fully Funded through the Apprenticeship Levy (up to **£15,000**). Non-levy employers typically pay just **5%**, with the Government funding **95%**.

Typical Duration & Delivery

Typically delivered over **18–24 months**, including **End Point Assessment**. Apprentices remain in role throughout, applying advanced analytical techniques directly to real workplace data.
