

DATA TECHNICIAN APPRENTICESHIP

Turn Your Data Into Better Decisions

*In today's fast-paced digital landscape, organisations need to build capabilities that combine operational excellence with modern technology. Qualitrain's **AI and Digital Apprenticeships** integrate **Lean and Six Sigma** expertise with hands-on experience from real-world digital improvement projects—equipping teams with the skills to drive efficiency, innovation, and sustainable results while building tomorrow's capability, today.*

What Is a Data Technician?

A Data Technician works with data from multiple sources, ensuring it is accurate, reliable and meaningful. They transform raw data into clear dashboards, reports and visualisations that help teams and leaders understand performance and identify opportunities for improvement.

This apprenticeship is an **ideal starting point for a career in data** and provides a strong foundation for progression onto Level 4 Data Analyst or Business Analyst roles.

Who Is This Apprenticeship For?

- Organisations in manufacturing, logistics, engineering, retail, finance, healthcare, education and the public sector
- Existing employees with strong analytical ability
- New hires looking to build data capability from the ground up
- Businesses wanting to make better use of the data they already hold

Key Skills Developed

- ✓ Collecting and sourcing data from internal and external systems
- ✓ Cleaning, validating and organising data
- ✓ Creating dashboards, reports and visualisations
- ✓ Communicating insights clearly to different audiences
- ✓ Supporting evidence-based decision making

Why Employers Choose This Course

- Turns existing business data into clear, actionable insight
- Builds in-house data capability without relying on external support
- Develops practical, job-ready skills with immediate workplace impact
- Suitable across all sectors and job roles
- Provides a clear progression route into advanced data roles
- Fully funded through the Apprenticeship Levy

Funded Through the Apprenticeship Levy

Fully Funded through the Apprenticeship Levy (up to **£13,000**). Non-levy employers typically pay just **5%**, with the Government funding **95%**.

Typical Duration & Delivery

Typically delivered over **18-24 months**, including **End Point Assessment**. Apprentices develop practical data skills while working in role, applying learning directly to real business data.
