

AI & AUTOMATION PRACTITIONER APPRENTICESHIP

Harness The Power Of AI & Automation

*In today's fast-paced digital landscape, organisations need to build capabilities that combine operational excellence with modern technology. Qualitrain's **AI and Digital Apprenticeships** integrate **Lean and Six Sigma** expertise with hands-on experience from real-world digital improvement projects—equipping teams with the skills to drive efficiency, innovation, and sustainable results while building tomorrow's capability, today.*

What Is an AI & Automation Practitioner?

An AI (Artificial Intelligence) & Automation Practitioner helps organisations reduce manual work and make better use of digital tools.

They identify inefficient processes and design practical AI-enabled and automated solutions using low-code and no-code platforms. This **Level 4 apprenticeship** develops the skills required to implement automation responsibly, while understanding data protection, governance and ethical considerations.

Who Is This Apprenticeship For?

- Organisations looking to improve efficiency through automation
- Employees involved in digital, operational or process improvement roles
- Teams adopting AI tools but lacking internal expertise
- Businesses seeking safe, responsible use of AI and automation

Key Skills Developed

- ✓ Identifying automation and AI opportunities
- ✓ Designing and implementing digital workflows
- ✓ Using low-code and no-code automation tools
- ✓ Applying AI responsibly and ethically
- ✓ Improving efficiency, accuracy and consistency

Why Employers Choose This Course

- Reduces manual effort and operational inefficiency
- Builds in-house AI and automation capability
- Supports responsible, compliant use of AI technologies
- Delivers measurable productivity improvements
- Applicable across all sectors and functions
- Fully funded through the Apprenticeship Levy

Funded Through the Apprenticeship Levy

Fully Funded through the Apprenticeship Levy (up to **£18,000**). Non-levy employers typically pay just **5%**, with the Government funding **95%**.

Typical Duration & Delivery

Typically delivered over **18 months**, including **End Point Assessment**. Apprentices remain in role throughout, applying automation and AI solutions directly to real business processes.
